INTERAPT

Our innovative skills program builds a talent pipeline tailored to each customer's unique needs, delivering impact and results at the same time.

We provide opportunity for everyone by intentionally investing in people and empowering them to achieve long-term success.

Tech in High-Demand
Tech roles are in high-demand and hard to fill. By 2026, there will be 1.3m tech job openings waiting to be filled. We have a qualified team ready to meet the need.

Unfilled Roles are Expensive
The cost of not filling an open tech role often costs more than the dedicated salary. A tech talent hole can cost a company an average of $7k-$10k monthly.

Impact Through Apprenticeship
Our graduates gain new skills, increase their earning potential by 140%, and stay on our team – all benefits that directly improve businesses and communities.
